PROFESSIONAL EXPERIENCE

- **Engineer | IHMCL (03/2025-present)**

Roles & Responsibilities

- Coordinated with all banks and system integrators to successfully complete UAT and deploy the **Annual Pass software across all toll plazas on 15th August**, achieving **10,00,000 active passes within 2 days**.
- Identified, analyzed, and cleaned **transaction, banking, and FASTag data** to extract key insights and highlight critical information for decision-making.
- Evaluated **AVC (Automatic Vehicle Classification) and ANPR systems** to ensure high accuracy and smooth operation of electronic toll collection.
- Coordinated with software teams to design, test, and deploy new website features, supporting 2,000–3,000 daily active users.
- Coordinated with stakeholders to align software development and deployment with overall **product vision and business goals**.
- Conducted **requirement gathering, feature prioritization, and UAT planning** to align product development with business goals and compliance needs.
- Worked closely with vendors and technology partners to **evaluate new solutions like RFID, QR-based tolling, and digital wallets** for future enhancements.
- Participated in **product roadmap discussions** by analyzing user feedback, transaction data, and stakeholder requirements.

- **Software Developer Intern | Alfaintellitek ITS (09/2024- 02/2025)**

Project: [Fincerif](#)

Objective: Delivered a comprehensive loan provider platform, managing the end-to-end project lifecycle and ensuring seamless integration of frontend and backend components

Responsibilities

- Designed and executed a roadmap to develop a user-centric platform offering 5 personalized loan types, catering to a diverse audience.
- Collaborated with cross-functional teams to integrate key features like bank eligibility checks, EMI calculators, and document submission functionality.
- Assisted in coordinating with stakeholders to streamline loan services and improve user experiences.
- Managed project timelines and ensured the platform's scalability to support over 100 daily visitors effectively.
- Focused on continuous improvement by incorporating user feedback to optimize registration workflows and user engagement.

Project: [OnlineCompany](#)

Objective: Developed a multi-service platform offering company registration, GST filing, and compliance services by overseeing project execution and delivery.

Responsibilities:

- Strategized and implemented a project roadmap for seamless service delivery, including blog creation, media uploads, and user lead management.
- Managed administrative functionalities such as content updates and user service tracking, improving operational efficiency by 50%.
- Facilitated collaborative efforts to ensure each of the 32 services had dedicated, user-friendly pages for better navigation and convenience.
